

Internship at CodeStreet

About us

CodeSteet is a financial services startup that is developing market-transforming trading desk applications for the fixed income space. Backed by some of the best-known names in the business from around the world, our products have generated an avalanche of industry goodwill and support. Having recently closed our first round of financing, we are experiencing rapid growth.

Position

We are looking for an exceptionally bright, energetic and motivated software developer for an internship. You will work alongside senior developers, assisting them with the testing and debugging of our trading system and message-oriented-middleware software products. You will also participate in product development. The level of responsibility and the complexity of the work will be up to you - there are few limits here. You will be expected to commit to 15-20 hours per week, but we are very flexible when it comes to schedules. We will also consider a full-time internship for those on leave of absence or recent graduates. We see these internships as a way to get to know you and for you to get real-time software development experience in the financial world. In the past, job offers have been extended.

Qualifications

- Candidate for BS/MS/PhD in computer science or related field.
- Working knowledge of C# and Java.
- Solid grasp of object-oriented design and implementation.
- Familiarity with relational databases, distributed systems, SQL server, UNIX-based systems, ASP.NET.
- Attention to detail, ability to clearly communicate ideas, and willingness to go the extra mile to deliver quality software.

To apply, please email your resume and cover letter to careers@codestreet.com . Please put "Internship Position" in the subject line.
