Polylogics Consulting, a leading software development company for the telephone directory industry, is seeking talented individuals looking to start or continue their careers at our rapidly-growing company. Based in Northern New Jersey, Polylogics offers candidates the opportunity to build experience in the field of computer programming while fostering both independent and collaborative thinking.

We have multiple positions available for candidates with excellent communication skills, the ability to work in a team environment and technical knowledge. Computer Science, Computer Engineering, IT, MIS degrees are preferred but not required. Knowledge of object oriented languages and software support experience or a customer service background are helpful. Competitive salary offered with a comprehensive health benefits package, paid vacation, personal and sick days, flexible spending account and 401(k).

Send your resume and cover letter today for immediate consideration.
